

Additions to the terrestrial molluscs fauna of Thailand

Wim J. M. MAASSEN

Nationaal Natuurhistorisch Museum, P.O. Box 9517, NL 2300 RA Leiden,
The Netherlands; maassen@naturalis.nnm.nl

Some new records of terrestrial molluscs for Thailand are given.

Key words: Gastropoda, Prosobranchia, Pulmonata, distribution, Thailand.

In the last years two checklists were published for the terrestrial malacofauna of Thailand (Panha, 1996; Hemmen, 2001). From different sources some material was received for identification. Mr. P. Subai (SA) during a trip to Thailand made a considerable collection of terrestrial molluscs; dr. E. de Vogel (VL) collected a small sample of leaf litter, and dr. J. J. Vermeulen made this collection available for study; mr. J. Hemmen (HM) submitted quite a large amount of material. A fair number of species seem to represent new records for the Thai fauna as these are not included in the two checklists mentioned above. These are the following (with references to the collectors indicated after the localities).

- Georissa williamsi* Godwin Austen, 1889 (Phattalung, SA)
Anaglyphula cf. *minutissima* Maassen, 2000 (Phang Nga, SA)
Liardetia doliohum (L.Pfeiffer, 1846) (Krabi, VL)
Liardetia indifferens (O.Boettger, 1891) (Kanchanaburi, SA; Phattalung, SA; Krabi, VL)
Ptychopatala orcula (Benson, 1850) (Phattalung, SA; Krabi, VL)
Queridomus fimbriosus (Quadras & Von Moellendorff, 1894) (Phang Nga, SA)
Pupisoma moleculina (Van Benthem Jutting, 1940) (Krabi, VL)
Nesopupa malayana malayana (Issel, 1874) (Krabi, VL)
Gyliotrachela hungerfordiana (Von Moellendorff, 1886) (14 samples from S Thailand, HW)
Philalanka carinifera (Stoliczka, 1873) (Phang Nga, SA)
Coneuplecta microconus (Mousson, 1865) (Phattalung, SA)

Except for *Anaglyphula minutissima*, hitherto known from its type locality in Sumatra only, all these taxa are wide-spread SE-Asian species. Some of these were illustrated and named as if new to science, but not formally described and differentiated, by Panha (2002: 231).

I would like to thank Messrs. J. Hemmen (Wiesbaden), P. Subai (Aachen) and J. J. Vermeulen (Singapore) for making available their collections for study.
