

RECORDS OF ODONATA FROM EL SALVADOR

If there are any published records of Odonata from El Salvador I am not aware of them. Dr. P.P. CALVERT mentions none in the *Biologia Centrali-Americana* (1901-1907), and none in his paper on the neotropical species of the "Subgenus *Aeschna*" (1956), and Dr. D.J. BORROR records none in his *Revision of the Genus Erythrodiplax* (1942). Any specimens from this area are of special interest even though of well-known species only.

The material listed below for which I have had the privilege of identifying is from the California Academy of Sciences, thanks to Dr. Paul H. Arnaud, Jr., and in the E.B. Williamson Collection, Division of Insects, Museum of Zoology, University of Michigan. All the specimens from the California Academy (CAS) were collected in 1963 by M. Irwin and D.Q. Cavagnaro; those in the Williamson Collection by David R. Lauck in 1957 (W-L) and by R.J. Dysart in 1959 (W-D). Eighteen species are represented in the 72 specimens from six Departments.

An asterisk (*) indicates duplicates of *Argia pulla* (2♂ 1♀), *A. translata* (2♂ 1♀), and *Neoneura amelia* (1♂ 1♀) were retained for the E.B. Williamson Collection.

Zygoptera: *Archilestes grandis* (Ramb.): LA LIBERTAD, 6 mi. w. Quezaltepeque, July 6, 1♀ (CAS); SAN SALVADOR, 20 mi. n. Apopa, July 19, 1♂ (CAS); — *Argia pulla* Hag.: LA LIBERTAD, 5 mi. n. Quezaltepeque, June 17, 3♂ 3♀, and Quezaltepeque, July 5, 5♂ 3♀ (CAS)*; — *A. translata* Hag.: LA LIBERTAD, 5 mi. n. Quezaltepeque, June 17, 7♂ 2♀*, and Quezaltepeque, June 19, 1♂ and July 5, 1♀ (CAS); — *Hetaerina* *itiria* (Dru.): SAN VICENTE, San Vicente,

July 7, 1♂ (W-L). — *Ischnura* (*Ceratura*) *capreola* (Hag.): LA LIBERTAD, Quezaltepeque, July 5, 1♂ 1♀ (CAS); SAN MIGUEL, San Miguel, July 24, 6♀ (W-L); — *Leptobasis vacillans atrodorsum* Calv.: LA UNION, s. of Santa Rosa, July 23, 1♀ (W-L); — *Lestes tenuatus* Ramb.: SAN SALVADOR, 20 mi. n. Apopa, July 19, 1♂ (CAS); — *Neoneura amelia* Calv.: LA LIBERTAD, 5 mi. n. Quezaltepeque, June 17, 5♂ 3♀ (CAS)*; — *Protoneura cara* Calv.: LA LIBERTAD, 5 mi. n. Quezaltepeque, June 17, 1♀ (CAS); — *Telebasis salva* (Hag.): LA LIBERTAD, Quezaltepeque, July 5, 1♂ inc. (CAS); SAN MIGUEL, San Miguel, July 24, 2♂ 1♀ (W-L).

Anisoptera: *Brechmorhoga praecox* (Hag.): LA LIBERTAD, Quezaltepeque, July 5, 1♂ (CAS); — *Brechmorhoga* sp. SANTA ANA, San Cristobal Frontera, July 29, 1♀ (W-L); — *Cannaphila vibex* (Hag.): LA LIBERTAD, Quezaltepeque, July 5, 1♂ (CAS); — *Dythemis sterilis* (Hag.): LA LIBERTAD, Quezaltepeque, July 5, 1♀ (CAS); — *Erythrodiplax connata fusca* (Ramb.): LA LIBERTAD, Quezaltepeque, July 5, 2♂ 1♂ (CAS); — *E. funerea* (Hag.): LA LIBERTAD, Quezaltepeque, July 5, 2♂ 1♀ (CAS); LA UNION, s. of Santa Rosa, July 23, 1 teneral ♀ (W-L); — *Perithemis mooma* Kirby: LA LIBERTAD, Quezaltepeque, July 5, 2♂ 1♀ (CAS); SAN MIGUEL, San Miguel, July 24, 1♂ (W-L); — *Tramea cophysa* Hag., form *a* of Ris: SAN MIGUEL, August 26, 1♂ (W-D).
