

**Notes on recent and fossil Neritidae 3:
erratum**

H.K. MIENIS

Department of Zoology, Hebrew University of Jerusalem

Due to an oversight by the editorial board of *Basteria* a regrettable mistake has crept into my paper 'Notes on recent and fossil Neritidae 3. *Neritina juttingae*, new name for *Nerita aculeata* Gmelin, 1791, non Müller, 1774 (Mollusca, Gastropoda)' in *Basteria* 37: 39-40, 1973.

The second sentence in the second paragraph on p. 39 should read: 'This name, however, is not available because it is a junior homonym of *Nerita aculeata* Müller, 1774, which again is a junior *synonym* of the West African potamidid *Tympanotonos fuscatus* (Linnaeus, 1758).'
