B. J. LEMPKE, Plantage Middenlaan 64, Amsterdam 1004 — Nederland

INHOUD: A. DIAKONOFF, Change of a genus group name (Lepidoptera) (p. 161). — BEREND AUKEMA, Voorkomen en levenswijze van *Oxycarenum modestus* (Fallén, 1829) (Heteroptera, Lygaeidae) (p. 161). — R. BATTEN, Mordellidae (Coleoptera) from the south of France and the Pyrenees (p. 164). — H. A. COENE, Einige Bemerkungen zur Tagfalterfauna Westbulgariens (p. 171). — Korte mededeling (p. 176: B. J. LEMPKE).

Change of a genus group name (Lepidoptera)

by

A. DIAKONOFF

Rijksmuseum van Natuurlijke Historie, Leiden

Dr. I. W. B. Nye of the British Museum (Natural History), London, kindly drew my attention to the fact that the genus group name *Clepsimorpha* Diakonoff, 1971, in the Tortricidae (*Veröff. Zool. StSamml. Münch.* 15:172), is preoccupied by *Clepsimorpha* Janse, 1900, in the Gelechiidae (The moths of South Africa 6:190).

I therefore change that name to *Clepsiphyes* nom. nov. The type species is *Capua pigra* Meyrick, 1921, from Java. The gender of the genus name is feminine.

Raamsteeg 2, Leiden.

Voorkomen en levenswijze van *Oxycarenum modestus* (Fallén, 1829) (Heteroptera, Lygaeidae)

door

BEREND AUKEMA

ABSTRACT

Oxycarenum modestus (Fallén) (Heteroptera, Lygaeidae) was captured in 1974 at two different localities in the province of Limburg. These were the first records since Cobben (1951) recorded it as new for the Dutch fauna from the same province. The larvae were successfully reared in female catkins of *Alnus glutinosa* (L.), which contained the ripe seeds. The biology of the species is discussed and the last instar larva is figured.

R. H. Cobben vermeldde in 1951 de eerste en tot dusverre enige vondsten van *Oxycarenum modestus* (Oxycareninae) in Nederland: Melick-Herkenbosch, 14.VIII.1948, 1 ♀; 17.VIII.1948,
