

Actualiteiten

Tunisian avifauna

We are in the process of compiling current knowledge about status and distribution of the birds of Tunisia. All unpublished information (old as well as recent), like birdwatching reports, bird-lists, or hand written notes, would be very appreciated. All records will be welcomed; those for scarce species should be supported, if possible, by detailed field notes. Please, send your information to: *Thierry Gaultier, INRST, Unité d'Ornithologie, BP 95, 2050 Hammam-Lif, Tunisia.*
