

6. Uurgemiddelden.

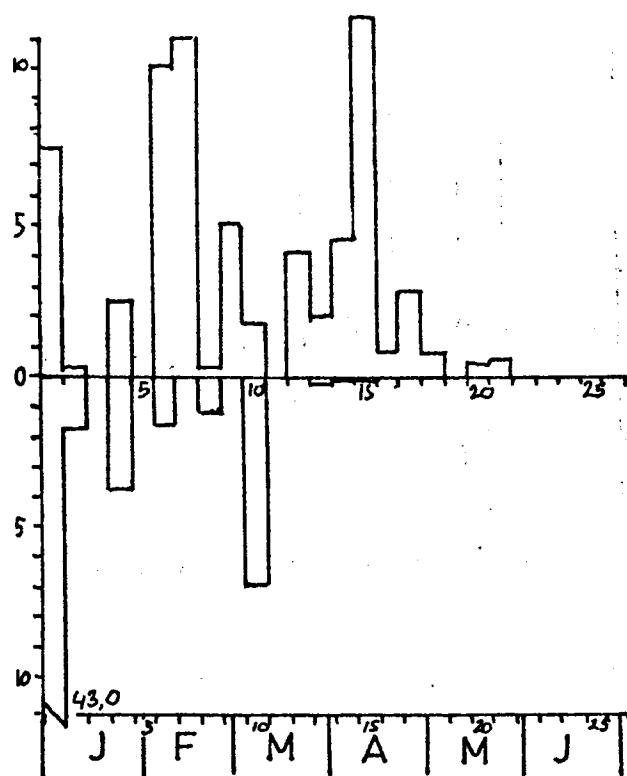

In de volgende figuren is het uurgemiddelde per zevendaagse periode weergegeven. Hierbij is steeds het uurgemiddelde van noordwaarts passerende vogels boven de abscis uitgezet, terwijl het gemiddelde van de zuidwaarts vliegende vogels onder de abscis is weergegeven. Voor de meeste soorten is alleen een figuur gegeven voor de Hollandse kust. Hier geldt de stippellijn weer voor waarnemingen van de Noordhollandse kust, de ononderbroken lijn voor de Zuidhollandse kust (+IJmuiden). Bij slechts een enkele soort werd ook het uurgemiddelde voor de wadden uitgezet (enkele, ononderbroken, lijn in de figuur en expliciete vermelding plaats).

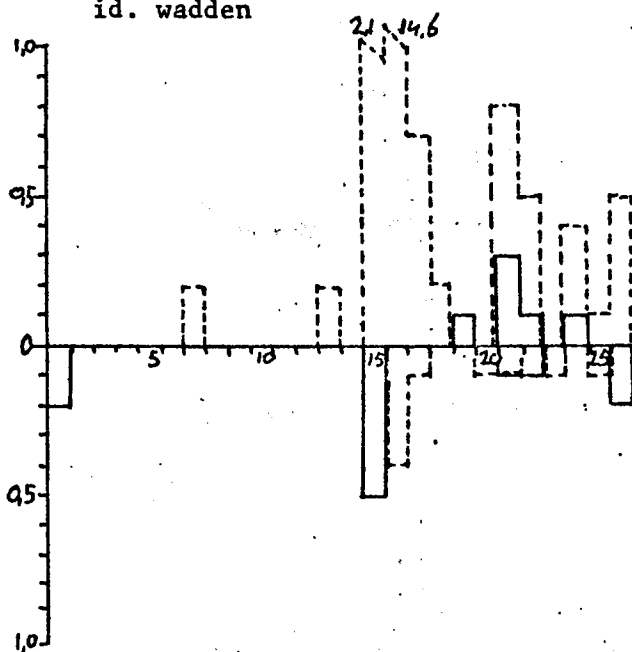

6.2. Duikers - *Gavia spec.*

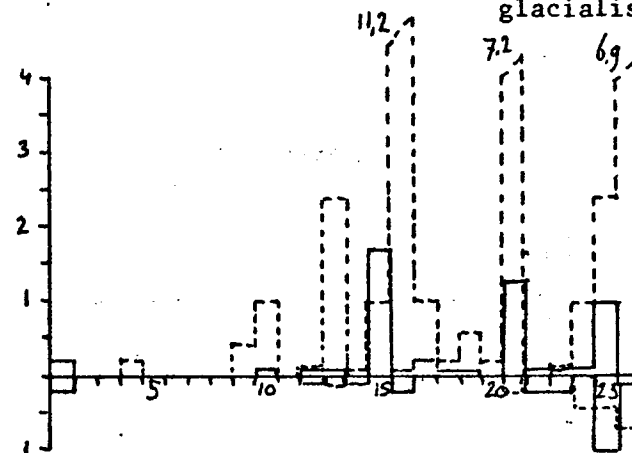

6.3. Fuut - *Podiceps cristatus*

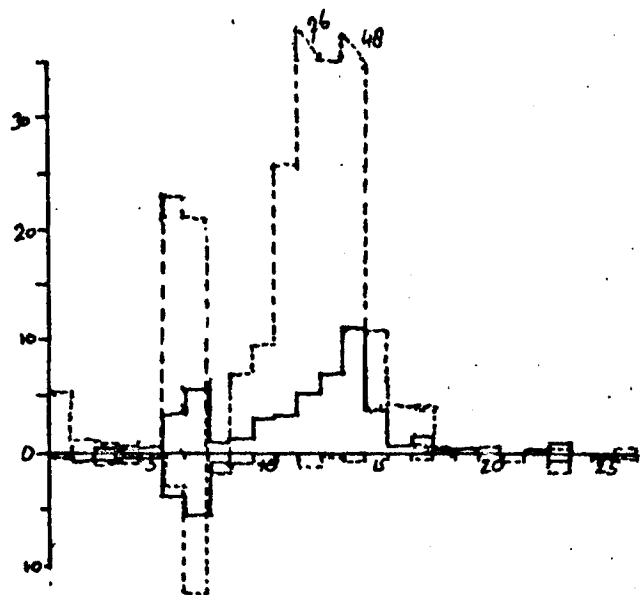

id. wadden

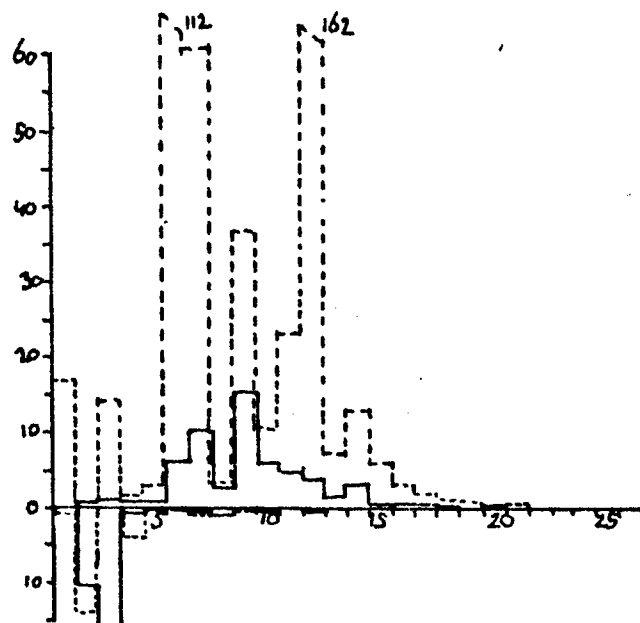

6.4. Noordse Stormvogel - *Fulmarus glacialis*

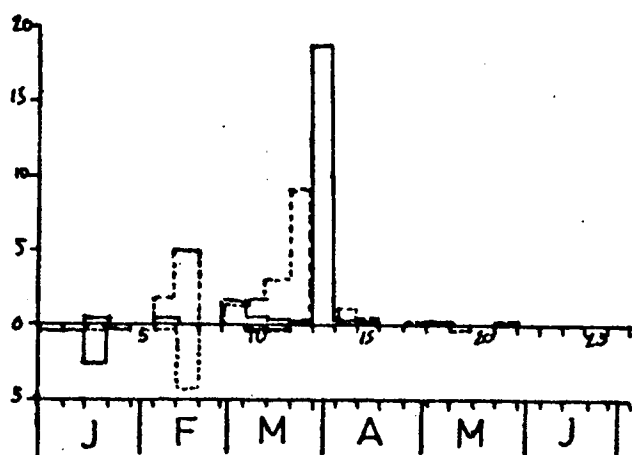

6.5. Jan van Gent - *Sula bassana*

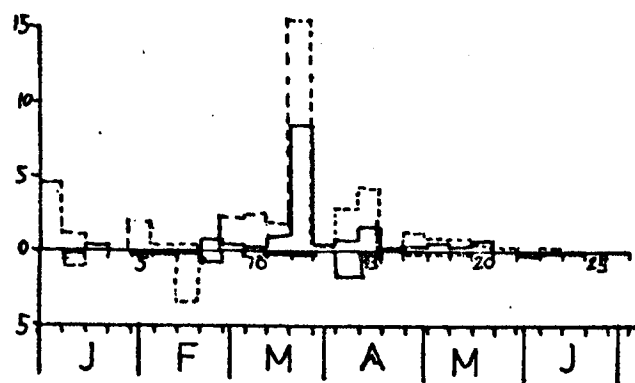

6.6. Wintertaling - *Anas crecca*

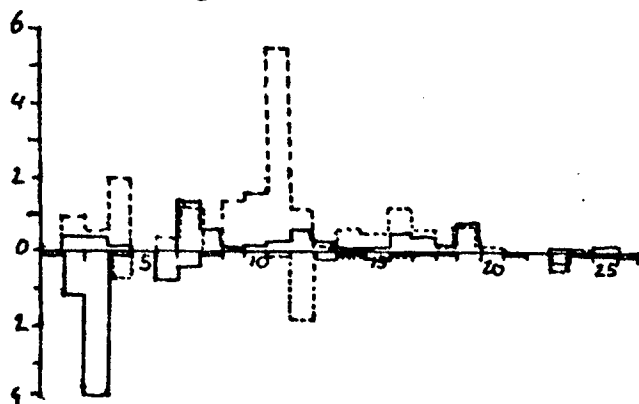

6.7. Smient - *Anas penelope*

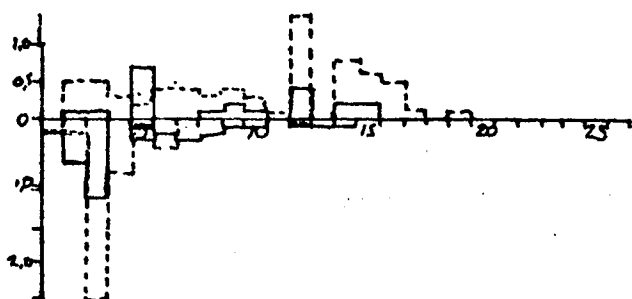

6.8. Pijlstaart - *Anas acuta*

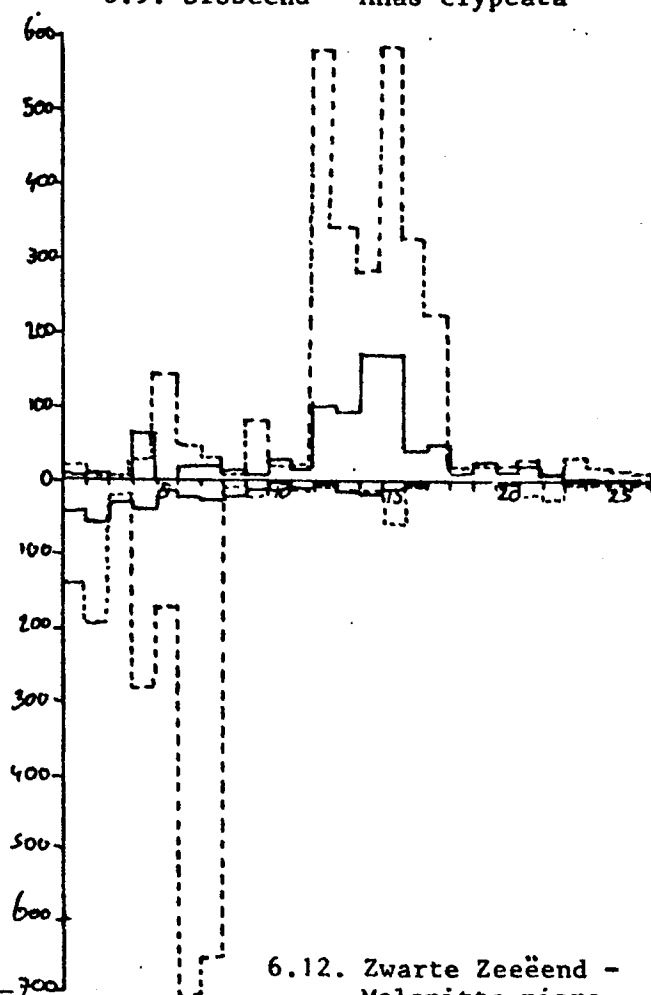

6.9. Slobeend - *Anas clypeata*

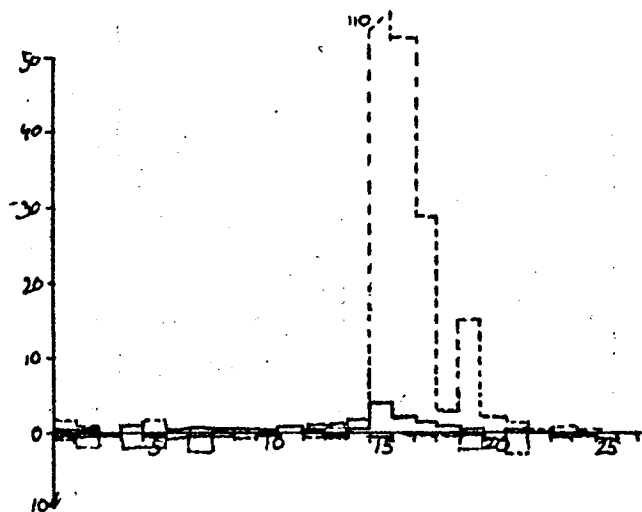

6.10. Kuifeend - *Aythya fuligula*

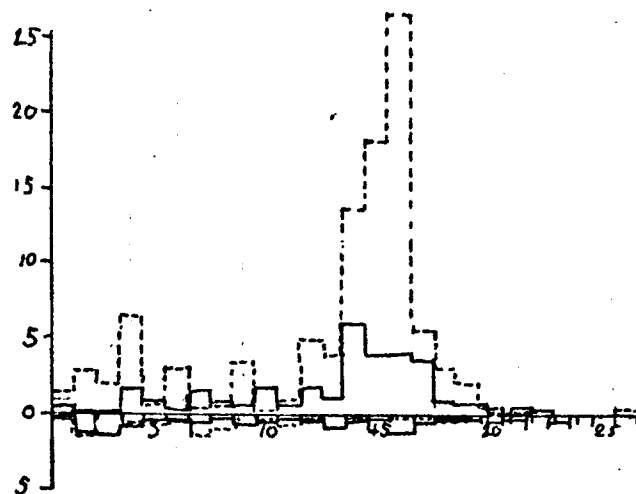

6.11. Brilduiker - *Bucephala clangula*

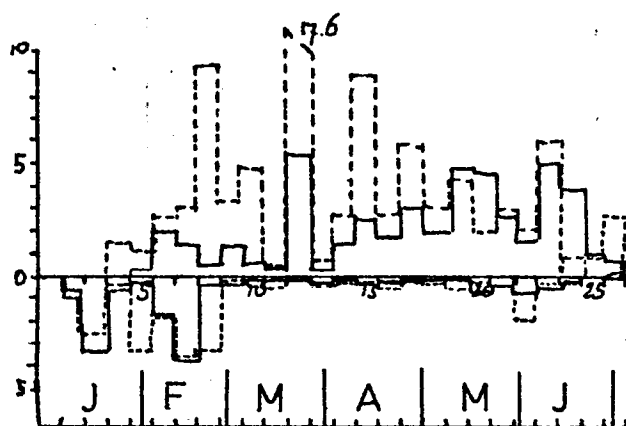

6.12. Zwarte Zeeëend - *Melanitta nigra*

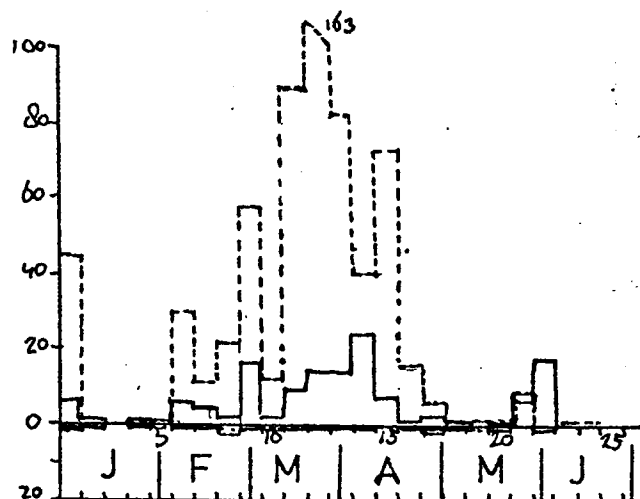

6.13. Grote Zeeëend - *Melanitta fusca*

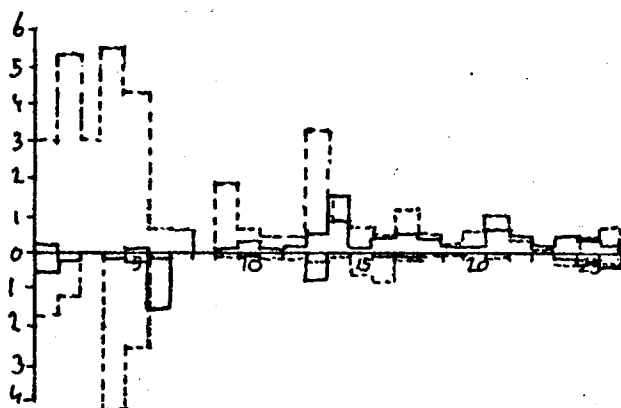

6.14. Middelste Zaagbek - *Mergus serrator*

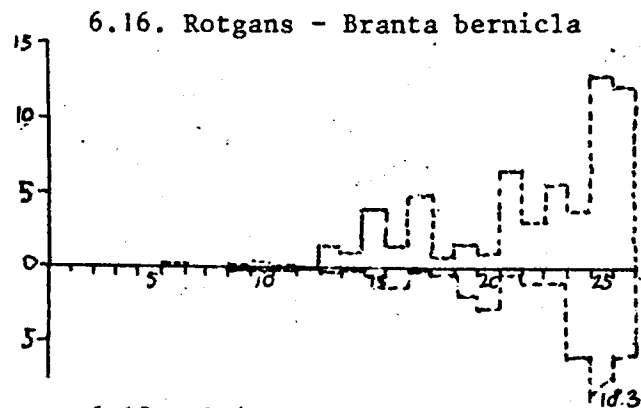

6.15. Bergeend - *Tadorna tadorna*

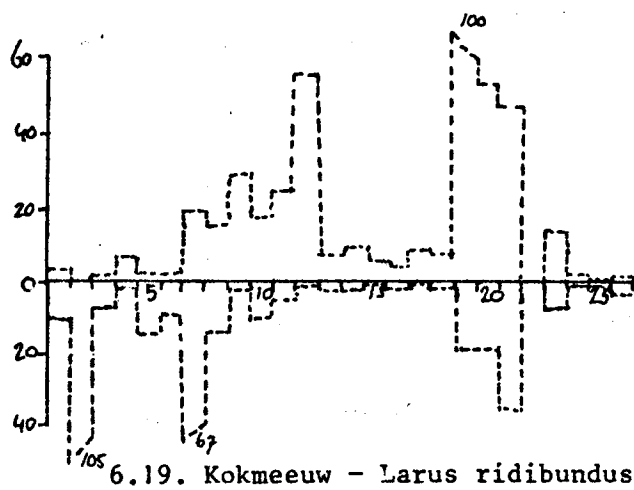

6.16. Rotgans - *Branta bernicla*

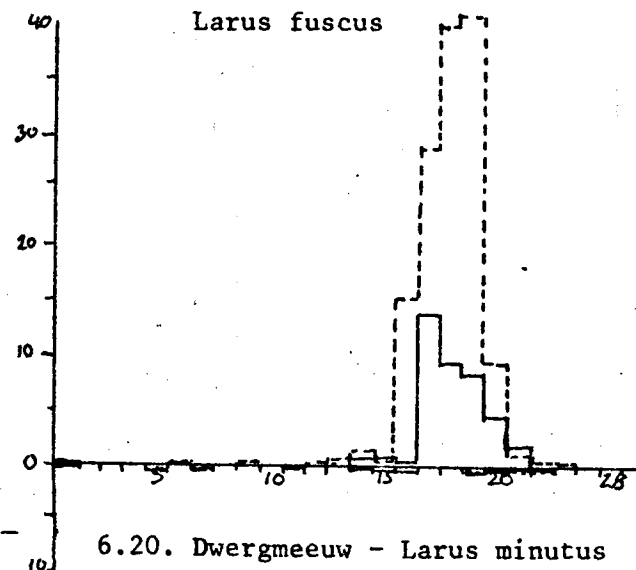

6.17. Grote Mantelmeeuw - *Larus marinus*

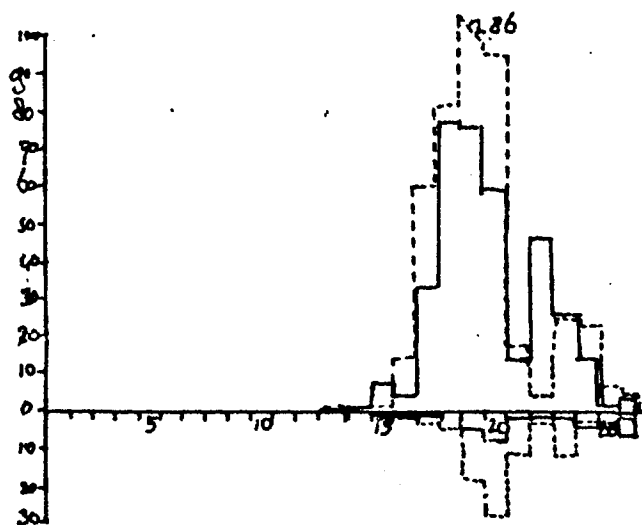

6.18. Kleine Mantelmeeuw - *Larus fuscus*

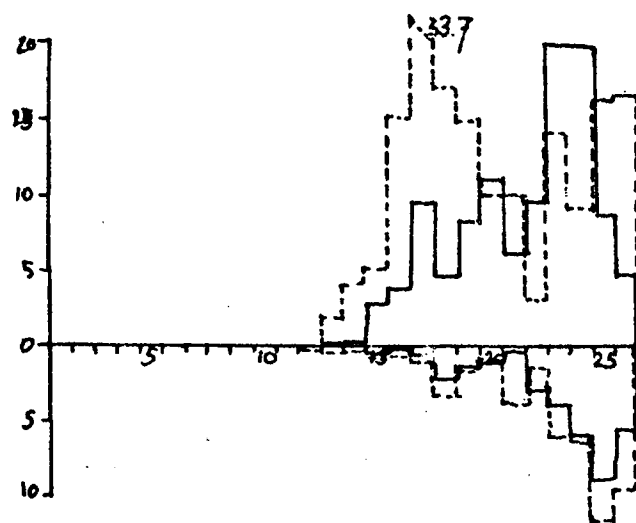

6.19. Kokmeeuw - *Larus ridibundus*

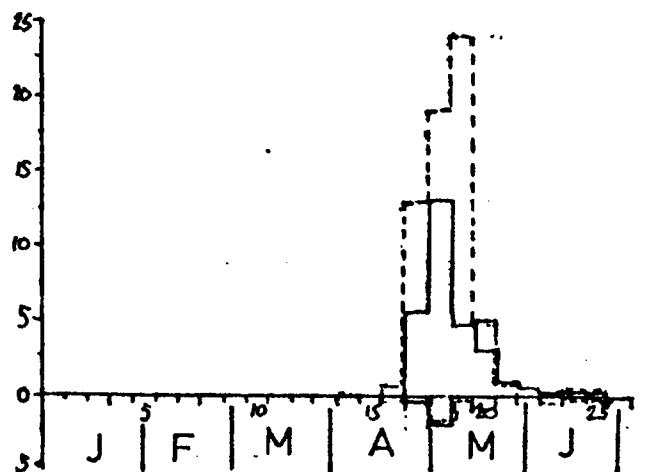

6.20. Dwergmeeuw - *Larus minutus*

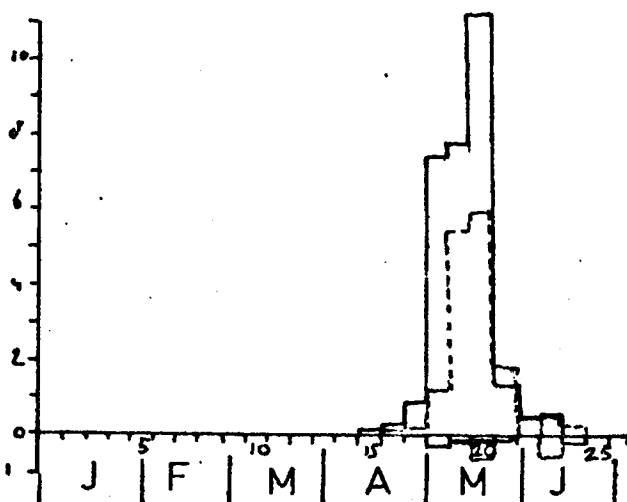

6.21. Noordse/dief - *Sterna hirundo/paradisaea*

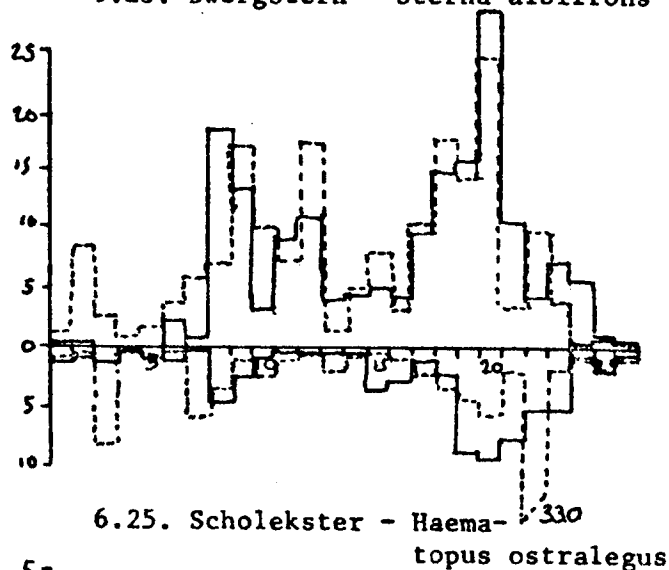

6.22. Grote Stern - *Sterna sandvicensis*

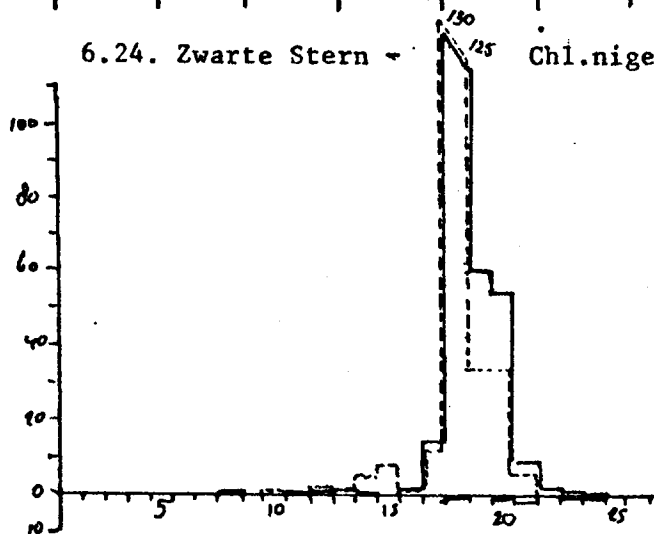

6.23. Dwergstern - *Sterna albifrons*

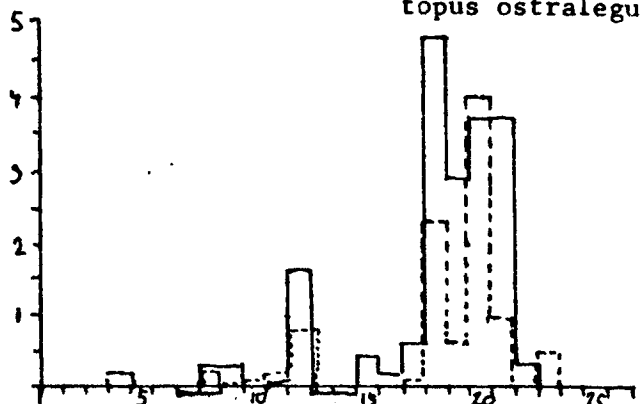

6.24. Zwarte Stern - *Chl.niger*

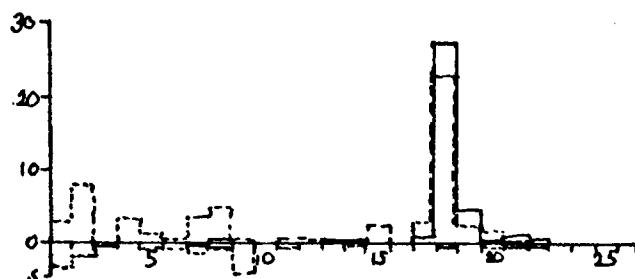

6.25. Scholekster - *Haemastopus ostralegus*

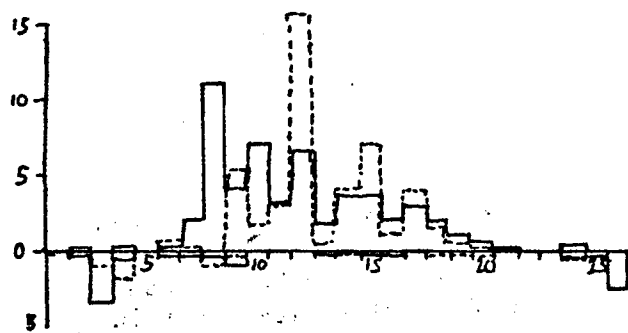

6.26. Zilverplevier - *Pluvialis squatarola*

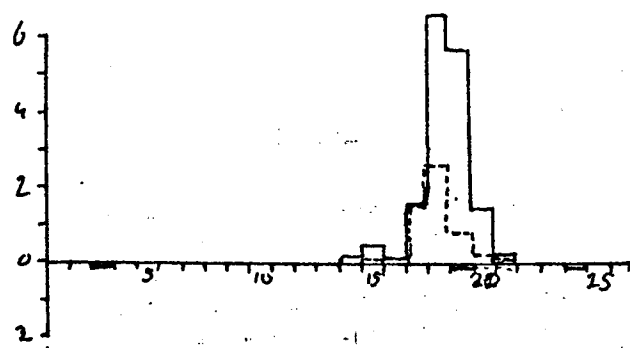

6.27. Bontbekplevier - *Charadrius hiaticula*

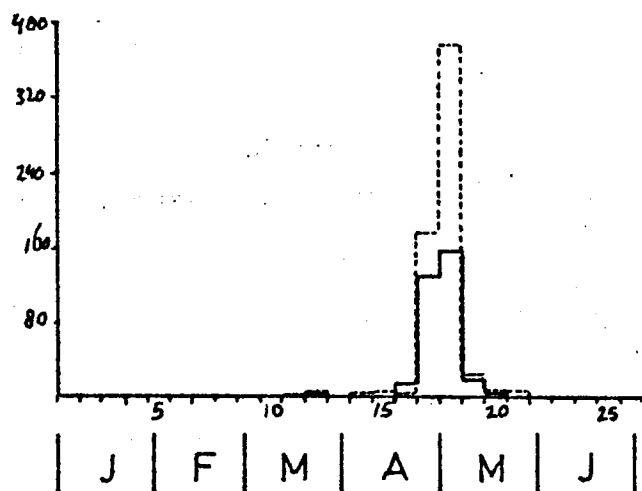

6.28. Steenloper *Arenaria interpres*

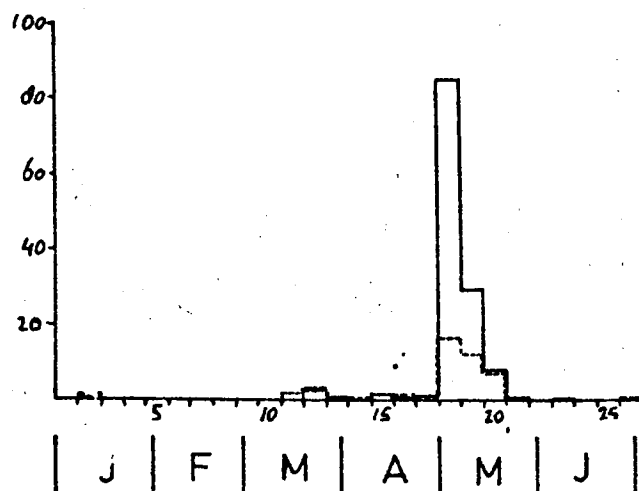

6.29. Wulp - *Numenius arquata*

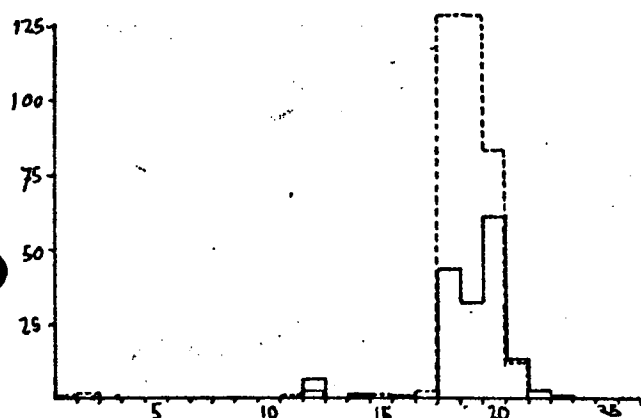

6.30. Regenwulp - *Numenius phaeopus*

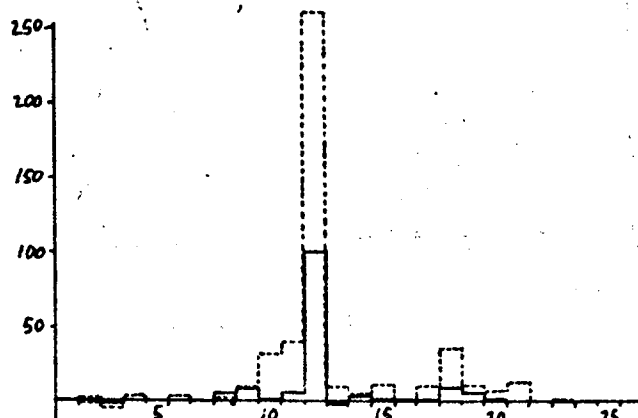

6.31. Rosse Grutto - *Limosa lapponica*

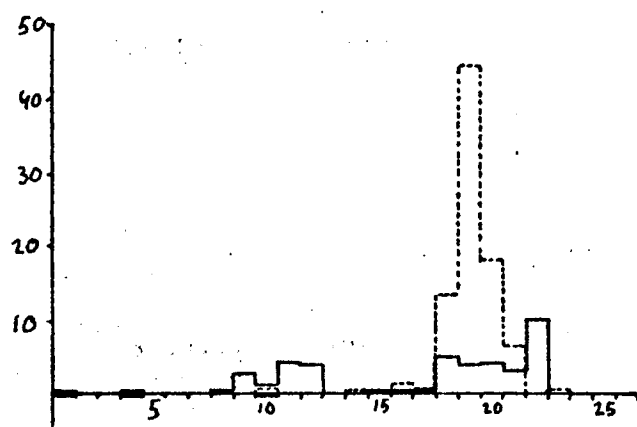

6.32. Tureluur - *Tringa totanus*

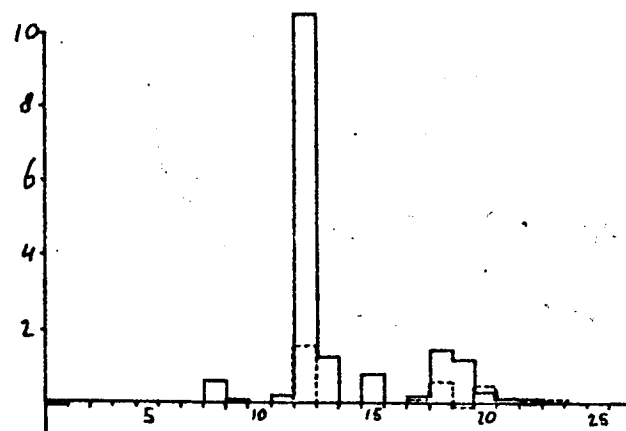

6.33. Kanoetstrandloper - *Calidris canutus*

6.34. Bonte Strandloper - *Calidris alpina*

6.35. Drieteenstrandloper - *Calidris alba*

6.36. Kluut - *Recurvirostra avosetta*
