

6. Uurgemiddelde-grafieken

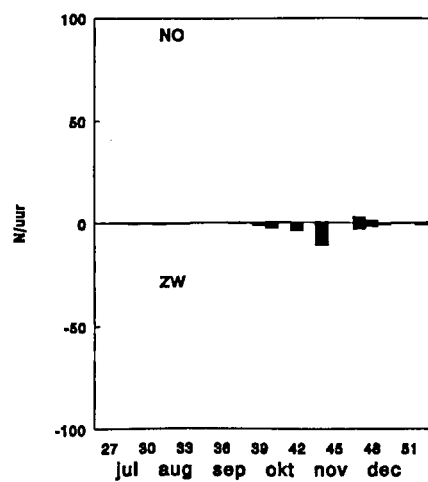

In de nu volgende grafieken is het uurgemiddelde per 7-daagse periode per deelgebied uitgezet. Hierbij is het uurgemiddelde van noord-waarts vliegende vogels boven de abscis uitgezet, van de zuid-waarts vliegende vogels onder de abscis.

In the figures the mean numbers of birds per hour per 7-day period for the three coastal regions are given. In these figures the mean number of birds flying north are plotted above the abscis, while the mean number of birds flying south are plotted below the abscis.
