## PREFACE

At the end of each number of the periodical *Odonatologica* are abstracts of publications or other items that refer to Odonata and that have not been published in *Odonatologica*. These abstracts, known as 'Odonatological Abstracts' (abbreviated 'OA') range from unamplified bibliographical citations to detailed critical reviews, and they constitute a valuable literature source. Our aim in this author index, as in the companion index to topics, is to make more accessible to odonatologists the Odonatological Abstracts in Volumes 1-12 of *Odonatologica*.

Each abstract is assigned a number (the OA number), and within each number of *Odonatologica* abstracts are arranged *primarily* chronologically, and *secondarily* in alphabetical order of an identifying word - usually the (first) author's last name or patronymic, sometimes the title of a serial or periodical (e.g. *Tombo*), and occasionally an abbreviated *nom de plume*. In this index we have always used the identifying word exactly as it appears in the abstract, even though to do so sometimes means including an additional (separate) entry for a single author if his or her name (or initials) have been printed differently in different abstracts. Users of the index should therefore bear in mind that one author may appear under more than one entry. Such multiple entries are usually adjacent to one another and therefore easily found; but where such names would, on account of their variable spelling (e.g. Haritonov, Kharitonov etc.), appear under different letters of the alphabet, we provide cross references to the alternatives.

Not infrequently an OA entry lists only the contents of a serial or periodical, giving authors and titles of contributions but no more than this. Each author named in such a list appears in the index, as does also the name of the serial or periodical.

Appendix I shows where abstracts appear in the volumes of *Odonatologica* to which this index refers.

Appendix II defines symbols and explains certain conventions we adopt.

We thank Jane E. Holmquist for valued help at an early stage of this compilation.

## APPENDIX II

## Symbols and conventions

## Symbols

Letters following abstract numbers have the following meanings:-

- a - Second or subsequent author.
- b - Author's name given in parentheses in abstract title.
- c - Second or subsequent author's name given in parentheses in abstract title.
- d - Paper entered only as title; abstract is name of journal or conference for which contents list is given.
- e - As d above, but multiple entry of author's name in abstract.

## Conventions

Names are entered as in the abstracts, the last name or patronymic being followed by the initials, with the following exceptions:-

- Surnames starting with 'de', 'del', 'le', 'von' etc. are entered under the main surname.  
For example 'De Marmels, J.' is entered as 'Marmels, de, J.'
- Titles such as 'Jr.', 'II', and 'III' are omitted, and hyphens are omitted from initials.  
For example 'White, III, J.R.' and 'Pilon, J.-G.' are entered as 'White, J.R.' and 'Pilon, J.G.'
- Accents and other diacritical marks are omitted.  
For example 'Åa, van der, A.J.M.' is entered and alphabetised as 'Aa, van der, A.J.M.'
- Cross-references are invariably given for multi-word and hyphenated surnames, and also in other instances where to do so is considered helpful.
