AN ADDITIONAL NOTE ON THE NAME
NEGOMPHOIDES MUTTKOWSKI, 1910
(ANISOPTERA: GOMPHIDAE)

One reference to the generic name *Negomphoides* apparently has been overlooked by everyone who has written concerning it — including myself. In the same year that R.A. MUTTKOWSKI proposed the name in his "Catalogue of the Odonata of North America" (1910, *Bull. publ. Mus., Milwaukee* 1/1: 1-207), he synonymized it with *Cyclophylla* (1910, *Bull. Wis. nat. Hist. Soc.* 8: 170-179) giving the following explanation (p. 174):

"Negomphoides, Aphylla and Cyclophylla. — Dr. Calvert holds that these three genera cannot be differentiated. In accordance with his view the new name *Negomphoides* Muttk. for *Gomphoides* Selys must be suppressed and *Cyclophylla* take its place".

This does not change the assignment of species given in my paper (L.K. GLOYD, 1973, *Occ. Pap. Mus. Zool. Univ. Mich.* 668: 1-7, pl. 1) to the genera *Gomphoides*, *Phyllogomphoides*, *Aphylla*, and *Phyllocycla* (the new name proposed by P.P. CALVERT, 1948, *Zoologica* 33: 47-87, pls. 1-2, on p. 62, for the preoccupied *Cyclophylla*). Species included in *Phyllocycla* form a generic group distinct from the species originally included in *Negomphoides*. However, the synonymy of *Negomphoi-*
