

ADDITIONS TO THE LIST OF ODO-
NATA FROM THE SURROUNDINGS
OF EINDHOVEN, THE NETHERLANDS

Two species can be added to the faunal list given by M.Th. WASSCHER (1979, *Notul. odonatol.* 1: 81-83), viz. *Gomphus vulgatissimus* (L) (3 exuviae, along the Tongelreep River, 8-VI-1976; identified by Dr. D.C. Geijskes), and *Somatochlora flavomaculata* (Vander L.) (1 ♂, in a heath along the Dommel, I-VII-1973).

A.W.M. Mol, Department of Animal Cytogenetics and Cytotaxonomy, University of Utrecht, Padualaan 8, Utrecht, The Netherlands.
