CAMERON, R.A.D. (2003): Keys for the identification of land snails in the British Isles. – Field Studies Council Publications (Occasional Publication 79) (Shrewsbury): iii + 82 pp. [ISBN 1-85153-890-9].

MARTÍNEZ-ORTÍ, A. & F. ROBLES (2003): Moluscos continentales de la Comunidad Valenciana. – Valencia (Generalitat Valenciana Consellaria de Territori i Habitatge): 259 pp. [ISBN 84-482-3524-X].

CHEN, D. & G. ZHANG (2004): Fauna Sinica. Invertebrata Vol. 37. Mollusca, Gastropoda, Stylommatophora: Bradybaenidae. – Beijing (Science Press): xii + 467 pp., 8 plates. [Chinese, English summary]. [ISBN 7-03-012246-1].

The present volume deals with a faunal work of the living land gastropods collected from Chinese land. A total of 200 species and subspecies are described, belonging to 31 genera & subgenera in one family. Among them, 12

species are described as new to science. The authors present a full account of morphological features, biological characteristics, geographical distribution and economic use of species. Keys to all taxonomic categories are given.
