- \* ALBUQUERQUE DE MATOS, R.M. (2004): Non-marine testaceous Gastropoda of continental Portugal and Berlengas Islands. I. Catalogue and bibliography. – Arquivos do Museu Bocage, Nova Série, 4 (1): 1-158. Lisboa. ISSN 0871-4843.
- \* BOUCHET, P. & J.-P. ROCROI (2005): Classification and nomenclator of gastropod families. – Malacologia, 47

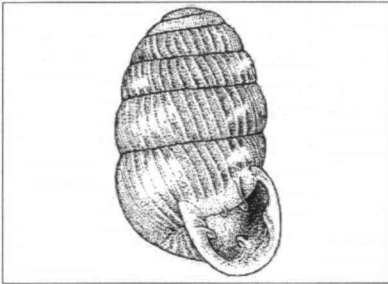

(1/2): 1-397. Hackenheim (Conch-Books). ISBN 3-925919-72-4. ISSN 0076-2997.

About 2,400 names at the rank of subtribe, tribe, subfamily, family and superfamily have been proposed for Recent and fossil gastropods. All names are listed in a nomenclator giving full bibliographical reference, date of publication, type genus, and their nomenclatural availability and validity

under the International Code of Zoological Nomenclature. Another 730 names, established for categories above the family-group, and not regulated by the Code, are listed separately. A working classification attempts to reconcile recent advances in the phylogeny of Gastropoda, using unranked clades above superfamilies, and the more traditional approach, using hierarchical ranking below superfamily. Altogether,

the classification recognizes as valid a total of 611 families of which 202 are known exclusively as fossils and 409 occur in the Recent with or without a fossil record. The nomenclator and classification will be updated in forthcoming editions to be published electronically.

- \* EGOROV, R. (2004): Treasure of Russian shells. Supplement 2. Directory of malacologists and conchologists of the CIS and adjacent countries (former the USSR). Second edition. – Moscow (Colus-Doverie): 41 pp. ISSN 1025-2517.
- \* EGOROV, R. & K. GREKE (2005): Treasure of Russian shells. Volume 7. Orculoidea. Orculidae, Strobilopsidae. – Moscow (Colus-Doverie LTD): 61 pp. ISSN 1025-2517.
