

Type specimens of Mollusca in the collection
of the Hebrew University of Jerusalem
2. Type specimens of recent Marginellidae¹

H.K. MIENIS

Department of Zoology, Hebrew University
of Jerusalem, Israel

This list of type specimens of recent Marginellidae is based on material present in the collections of the late Giorgio S. Coen (HUI-Coen) and the late Arthur Blok (HUI-Blok). Both collections now form part of the mollusc collection of the Hebrew University of Jerusalem since 1953 and 1974 respectively.

The list includes a total of 17 entries, all syntypes, which are arranged alphabetically according to the names of the species. Each entry contains the reference to the original publication, type locality, number of specimens and collection number.

In order to expedite the publication of this catalogue, we do not consider at this moment the status of the different taxa.

The list is published in compliance with Recommendation 72D of the International Commission on Zoological Nomenclature.
