

**New records of *Hypnophila malagana* from S. Spain
(Gastropoda Pulmonata: Cochlicopidae)**

E. GITTENBERGER

Rijksmuseum van Natuurlijke Historie, P.O. Box 9517, NL 2300 RA Leiden, The Netherlands

Our knowledge concerning the distribution of *Hypnophila malagana* Gittenberger, 1983, is summarized.

Key words: Gastropoda, Pulmonata, Cochlicopidae, *Hypnophila malagana*, distribution, Spain.

Only five years ago, *Hypnophila malagana* was described as a new species from the province of Málaga in S. Spain (Gittenberger, 1983: 304). Meanwhile the species has become known from five additional provinces, which implies a considerable extension of its known range. The new records are listed below. Material of all these recently discovered localities could be studied by the present author. It turned out that the original description should be emended only with respect to the dimensions of the shell (height 4.8 to 6.2 mm; width 1.9 to 2.25 mm). Apparently, *H. malagana* is rather uniform conchologically. Some of the new records have been published already by Escolà & Bech (1986: 89).

For collections the following abbreviations are used: MZB, Museu de Zoologia (Barcelona); RMNH, Rijksmuseum van Natuurlijke Historie (Leiden). Following the collection the number of specimens is indicated.

Records (with the 1 km or 10 km UTM-grid code).—Spain. Cádiz: Arroyo Molinos near Zahara, TF8878 (MZB/1). Castellón: Serra d'En Galceran, Cova Santa, YK5567 (MZB/3). Granada: 28 km ESE of Cazorla in the Parque Natural de las Sierras de Cazorla y Segura, along the Embalse del Tranco de Beas, WG28 (RMNH/3). Jaén, 7 km SSE of Cazorla near the spring of the Guadalquivir, WG08 (RMNH/1). València: Serra de Porta-Coeli, Avenc Garbí, YJ1290 (MZB/1).

The species was originally described from the province of Málaga only: UF15, 34, 48 & 65 (Gittenberger, 1983: 306).

I would like to thank both Dr. O. Escolà (Barcelona) and Mr. H. B. Marcus (Huis ter Heide), who most kindly sent me material on loan for study, additionally allowing me to publish results of their investigations.
