

**One new name and two new synonyms in Turkish Enidae
(Gastropoda, Pulmonata)**

E. GITTENBERGER

& H.P.M.G. MENKHORST

National Museum of Natural History *Naturalis*, P.O. Box 9517, NL 2300 RA Leiden, The Netherlands.

Three nomenclatorial corrections, as a sequel to Gittenberger & Menkhorst (1991, 1993), are executed. Because of junior homonymy, *Buliminus (B.) corpulentus* is replaced by *B. (B.) corpulentior* nom. nov. *Pene coluplicatus* and *Turanena yusufelensis* are now considered junior synonyms of *P. brunneus* and *T. andronakii*, respectively.

Key words: Gastropoda, Pulmonata, Enidae, *Turanena*, new synonymy, *Buliminus*, new name, Turkey.

Enidae B.B. Woodward, 1903 (1880)

By Opinion 2018 (Case 3192) [Bulletin of Zoological Nomenclature 60 (March 2003): 63] Buliminidae Kobelt, 1880, is emended to Buliminusidae, and Enidae B.B. Woodward, 1903, is given precedence over Buliminusidae Kobelt, 1880. We follow ICZN Article 40, Recommendation 40A, in citing the date of the replaced family name in parentheses after the valid family name with its author and date.

Buliminusinae Kobelt, 1880

Buliminus (B.) corpulentior nom. nov.

Initially we overlooked that *Buliminus (B.) corpulentus* E. Gittenberger & Menkhorst, 1991, has to be considered a junior homonym of *Buliminus cantori* var. *corpulenta* Gredler, 1884. The former name is replaced here by *Buliminus (B.) corpulentior* nom. nov.

Pene brunneus (Hesse, 1914)

Petraeus kotschy brunneus P. Hesse, 1914: 67.

Ena (Mastus) leprevieri Pallary, 1929: 22.

Buliminus (Pene) coluplicatus E. Gittenberger & Menkhorst, 1991: 87. New synonymy.

While basing our revision on the excellent monograph of the Turkish Enidae by Forcart (1940), we did not realise that the former territory of Turkey differed from the present extent of that country. Hesse (1914) and Pallary (1929) dealt with a region that was

not covered by Forcart (1940). Thus, the error was completely ours.

Turanena andronakii (Lindholm, 1913)

Buliminus (*Ena*) *andronakii* Lindholm, 1913: 20.

Turanena yusufelensis E. Gittenberger & Menkhorst, 1993: 81.

One of the very few species mentioned, but not illustrated, by Forcart (1940: 131), was overlooked, despite the detailed original description in combination with the localities Artvin, situated 45 km NNE. of Yusufeli and Lomaschen (= 5 km E. of Artvin).

ACKNOWLEDGEMENTS

We cordially thank the colleagues who generously called our attention for one or more of our errors that are corrected in this paper.
