

**The genus *Inchoatia* (Gastropoda, Pulmonata, Clausiliidae) validated
and three mistakes corrected**

The generic name *Inchoatia* is validated by the designation of a type species and three mistakes are corrected.

Key words: Gastropoda, Pulmonata, Clausiliidae, Alopiinae, *Inchoatia*, *Protalbinaria*, A.J. Wagner, Greece.

By omitting a type species designation, Gittenberger & Uit de Weerd (2006: 65) have incorrectly introduced *Inchoatia* gen. nov. To validate the name, we here add that *Inchoatia inchoata* (O. Boettger, 1889) has to be considered the type species.

The species that is now called *Isabellaria parnassia* (O. Boettger, 1888), was originally classified with *Clausilia* Draparnaud, 1805, so that contrary to Gittenberger & Uit de Weerd (2006: 65) the author has to be cited in parentheses.

Gittenberger & Uit de Weerd (2006: 61) referred to *Carinigera* (C.) *buressi* (A.J. Wagner, 1927). However, according to Hesse (1933: 224), A.J. Wagner's paper dates from 1928. As a consequence, 1927 has to be replaced by 1928. Hesse's statement is supported by Polinski (1929: 19), who indicated that this paper, i.e. Wagner's final publication, was published only a few weeks before his death on June 12th, 1928.

Contra Nordsieck (2001: 20) we do not consider *Protalbinaria* A. [J.] Wagner, 1923, a nomen nudum. A. [J.] Wagner (1923) published a description. The generic name was introduced without any included nominal species indeed, but before 1931, which implies that it is available (Art. 67.2.2.). The type species was designated correctly by Nordsieck (2001: 20) from among the first subsequently and expressly included nominal species (by A. [J.] Wagner, 1924).

ACKNOWLEDGEMENT

We thank Prof. Dr R.A. Bank for his constructive, critical comments, and valuable data.
